

MASTER FORMULA™

MASTER FORMULA Cleaner Gloss was designed to remove oxidation, water spots, and hazy hairline scratches from painted surfaces. The sun's rays constantly corrode everything on the planet. This process begins on painted surfaces rather quickly. A car only a few months old may still be considered new, but there is already a difference in the paint's finish. It's no longer silky smooth. If you lightly feel it with your fingernails, it will send a tingle up your spine.

Noticeably, it's worse on the hood, trunk, and top, than on the sides because the sun shines down directly from the top.

Master Formula Cleaner Gloss was designed to clean away the rough build-up of oxidation, water spots, and even bird droppings on painted surfaces. It polishes to an extreme silky smooth finish. This scientific formula efficiently cleans the surface and restores the gloss. Whether the oxidation is just beginning, or has

reached an advanced stage, **Master Formula Cleaner Gloss** will restore the surface to its original slick and glossy finish.

After polishing with **Cleaner Gloss**, be sure to seal the new surface with **Master Formula Paint Sealer Gloss** for long-lasting protection and water beading.

ALSO AVAILABLE IN 12 OZ. BOTTLES
4 OZ.: PART NO. 7008 / 12 OZ.: PART NO. 7002
