

MASTER FORMULA Lens Gloss is a creation we designed in response to customer requests. The desire for perfection has risen to focus on polishing accessories. Headlights and turn signals now need the same extreme gloss wet look of the rest of the vehicle.

At trade shows where we test marketed our line of products, customers repeatedly asked if we had a product that would polish their headlamps, stop lights, or turn signals.

We realized these plastic items needed polishing because, like paint, they were also oxidizing.

Fortunately, our experience in research on polishing oxidized surfaces offered a wealth of formulas to begin with. What we ended with was the creation of **Lens Gloss**.

Lens Gloss cleans and polishes glass, plastic, and fiber glass to an amazing high gloss on new vehicles. It restores the surface on older vehicles, removing oxidation and that hazy dullness. It leaves a clear, wet look gloss. It's great for use on emergency vehicle red lights, brake lights, turn signals, and headlamps.

So now when a customer asks if we have a product to polish their plastic accessories, we say yes, we sure do. If you're one of those perfectionists who are now focusing on your accessories, you'll be happy to try our new creation **Lens Gloss**. We know you'll love it.

**ALSO AVAILABLE IN 8 OZ. BOTTLES
4 OZ.: PART NO. 6003 / 8 OZ.: PART NO. 6001**
